MATERIAL GUIDE

Silestone

Mineral surface by Cosentino

Low crystalline-silica mineral surface made with HybriQ+ technology.
Suma - Le Chic - Urban Crush - Ethereal - Eternal - Earthic and more.

01 — BRAND & MATERIAL

Brand & material

Silestone® is Cosentino's mineral surface brand. Cosentino states that since 2023 all Silestone colours are manufactured with low crystalline-silica content using HybriQ+® technology. It is no longer simply 'quartz' in the old sense — its current positioning is a mineral surface with reduced crystalline silica and recycled content.

Why Silestone

- **Mineral, low-silica** — not just 'quartz' in the old marketing sense, but a mineral surface with reduced crystalline silica.
- **The live catalogue rules** — Cosentino's live colour catalogue is the source of truth for current selection.
- **Per-colour specs** — don't transfer one colour's technical assumptions to another; each has its own classification.

Best-fit applications

- Kitchen countertops and islands
- Bathroom surfaces and furniture
- Wall cladding and backsplashes
- Commercial interiors and hospitality

02 — PRODUCT PORTFOLIO

Product portfolio

Organised by the manufacturer's current collection structure. Product names are retained as published; availability can change by country, distributor and production batch.

Current families

Suma · Le Chic · Urban Crush · Ethereal · Eternal · Loft · Earthic · Nebula / Nebula Alpha / Nebula Code · Mythology · Basiq · Stellar · Influencers · Sunlit Days

Ffrom01 · Ffrom02 · Ffrom03 · Raw A · Raw D · Raw G

03 — SPECIFICATION & APPLICATION

Specification & application

Technology	HybriQ+® is the low-crystalline-silica manufacturing platform
Silica	Cosentino distinguishes colours with max 40% crystalline silica and Q10/XM with max 10%
Recycled content	HybriQ+ Silestone includes at least 20% recycled material (per Cosentino)
Current Suma	A seven-colour family centred on neutral cream-white stone aesthetics

Check the individual colour's silica classification and technical sheet. Regional availability can differ from the global catalogue. Fabrication and installation must follow current Cosentino guidance. Research snapshot, August 2026.
